

Dear students,

As we had some video classes in Part II Sem, I request you to kindly contact me through email for ~~st~~ resuming classes.

→ Also I am giving you an assignment sheet so that I should know what is your understanding about your own subject. Kindly solve it and mail to me on.

aunkitaojha26@gmail.com.

Q1: What are differences between shell model and liquid model of nucleus.

Q2: Take up five common polymers and write down -
its → monomer

polymerization mechanism
polymeric structure
Applications.

Q3: Write short note on nanomaterials and their features in terms of optical properties, conductivity and magnetic behavior.

Q4: Make a powerpoint on nuclear wastes (at least 10 slides) and send them till 11th August. For anyone having issue with laptop or phone can send handwritten notes scanned copy.
