Understanding how the brain works

Subunit 1

10/12/2017 Learning and memory

perceptual learning and memory

perceptual learning is a form of learning that occurs when we repeatedly practice a task. It is a form of learning that occurs when we repeatedly practice a task. It is a form of learning that occurs when we repeatedly practice a task.

perceptual learning is a form of learning that occurs when we repeatedly practice a task. It is a form of learning that occurs when we repeatedly practice a task. It is a form of learning that occurs when we repeatedly practice a task.

perceptual learning is a form of learning that occurs when we repeatedly practice a task. It is a form of learning that occurs when we repeatedly practice a task. It is a form of learning that occurs when we repeatedly practice a task.

perceptual learning is a form of learning that occurs when we repeatedly practice a task. It is a form of learning that occurs when we repeatedly practice a task. It is a form of learning that occurs when we repeatedly practice a task.

मानव चेतना 3 स्तरों में कार्य करती है। एक स्तर में
 चेतना का काम करना करना होता है जो कि सतह
 को व्यक्त करता है। द्वितीय स्तर चेतना को सतह
 को व्यक्त करता है। तृतीय स्तर चेतना को सतह
 को व्यक्त करता है।

1) Perceptual defense (Perceptual defense)
 चेतना को सतह पर रखना (Perceptual defense)
 चेतना को सतह पर रखना (Perceptual defense)
 चेतना को सतह पर रखना (Perceptual defense)

2) Person perception (Person perception)
 चेतना को सतह पर रखना (Person perception)

3) Subliminal perception (Subliminal perception)
 चेतना को सतह पर रखना (Subliminal perception)
