are coloured and they are made up of coloured hydrocarbons responsible for the coloured colour.

(i) Blue colour They are formed and found in water and in soil. They are responsible for the blue colour in water and in soil. They are formed and found in water and in soil.

Green

Green colour They are formed and found in water and in soil. They are responsible for the green colour in water and in soil.

Yellow

Yellow colour They are formed and found in water and in soil. They are responsible for the yellow colour in water and in soil.

Orange colour They are formed and found in water and in soil. They are responsible for the orange colour in water and in soil.
