

Scope of Public Administration

In the modern time Public Administration have a pivotal role. There are many discussions about the scope of Public Administration. Some scholars have argued that in the Neo-Liberal time the scope of public administration is very less and private administration have growing importance. Some argues that the neo-liberal time the term public administration has significant one because the neo-liberal state has faced many problems like environmental and technological issues. The scope of public administration deals in many ways with people. Public administration is an organisational effort and needed a close relation to people. In every administrative system they have good relation with between people and administrative agencies. It influenced the day to day life of the common people. In a democratic political system scope of public
