

Marxist Idea of Dictatorship of Proletariat

Dictatorship of Proletariat is an important concept of Marxist Marx's writings. According to him dictatorship of Proletariat is a necessary intermediate point or a transitional phase on the path from capitalism to socialism and communism. He further clarified that between capitalism and communist society lies a period of revolutionary transformation from capitalism to socialism. In political sphere will take the form of dictatorship of proletariat. It is the first step in the liberation of the working class which will raise the proletariat to the position of a ruling class. In Marx's view during the dictatorship of the Proletariat there will be regime in which the Proletariat will control the state power. Such a transitional phase of dictatorship of the Proletariat is necessary because the whole destruction of whole capitalist, social and political order cannot be fully achieved without capturing the state power and without using it as an instrument to create conditions for the ushering in of a communist social order.
